What I Do

🖥 IT & Software Development

Analyze users' needs and then design and develop software to meet those needs. Recommend software upgrades for customers' existing programs and systems. Design each piece of an application or system and plan how the pieces will work together.

⚙ IT & Software Maintenance

Software maintenance is the process of changing, modifying, and updating software to keep up with customer needs. Software maintenance is done after the product has launched for several reasons including improving the software overall, correcting issues or bugs, to boost performance, and more.

Open Source Projects
